Technologies

Java	MySQL	HTML
Spring	Python	CSS
Hibernate	Flask	Javascript

Projects

AirbnbCleaning
Web app built in Java with the Spring framework, using Hibernate, Thymeleaf, and Bootstrap 4.
Hosted live on Heroku and in use by a client managing 7 Airbnb properties.
Automatically populates cleaning schedule by scraping confirmation emails.
Client can add/edit/remove cleanings and view monthly financial data.

Blogz
Assignment for LaunchCode's LC101 class built with Python and Flask.
Users can log in, view others' blogs, and add their own.

Work Experience

Eric Schneider Photography - *(2013 - Present)*
Freelance photographer focused on portraits and event photography. Works with clients to plan out events and create solutions. Created efficient photobooth workflow and setup.
